SUMMARY:

Aspiring full-stack developer pursuing a degree in Computer Science with expertise in Django, front-end technologies, and database management. Passionate about building scalable web applications and collaborating with dynamic teams to solve real-world problems.

SKILLS:

- Python Django
- Django REST Framework
- React JS
- Git and Github
- HTML/CSS
- Javascript
- Backend Development
- Web Design
- AWS Basics

PROJECTS :

Storage Optimization for CCTV Footages

Built an integrated solution featuring both desktop and web applications. Implemented sophisticated frame comparison techniques to identify and eliminate redundant visual data, dramatically reducing storage requirements and enhancing system efficiency. **github**

Technology Used : Python Django, REST ,OpenCV,TKinter,HTML ,CSS ,Bootstrap,JavaScript

React Landing Page

Engineered and deployed a React.js landing page with interactive widgets and animations. Leveraged Netlify for seamless hosting, showcasing full-stack development capabilities. **github**

Technology Used : React Js, HTML,CSS,Javascript,Bootsrap

Jalakam Result Portal

I have built this project during my undergraduate studies for my college's Fine Arts Day to facilitate the management and viewing of results. In this project, coordinators can upload real-time results, which students can then access seamlessly. **github**

Technology Used : Python Flask,HTML ,CSS,JavaScript

CO-CURRICULAR ACTIVITIES

National Service Scheme
Orchestrated community service projects through National Service Scheme participation during secondary and undergraduate studies.

Bharat Scouts and Guides
Orchestrated community service projects through National Service Scheme participation during secondary and undergraduate studies.

EDUCATION:

Master of Computer Applications
Christ Deemed to be University   -Present

BSc Mathematics
Kannur University ,Kerala   -2020-2023

Percentage - 91.38
